Levin, Ya. A.
STUDY OF COOLING OF TURBINE BLADES BY AN AIR-WATER MIXTURE (Izycheniye Okhlazhdeniya Turbinnykh Lopatok Vozdushnovodyanoy Smes'yu). 15 Feb 60 [8]p. Trafford Park trans. 2771: M 1561. Order from LC or SLA mi$1.80, ph$1.80 60-23005

Trans. of Teploenergetika (USSR) 1959 [v. 6] no. 12, p. 43-46.

External cooling of the rotor blades of turbines with an air-water mixture makes it possible, in principle, to ensure normal operating conditions at any temperature. The thermal stresses in the disc of the turbine rotor wheel may also be reduced. Operating experience of steam turbines shows that substantial destruction of the inlet edges of blades, made from readily available materials, is observed at a high degree of steam wetness (more than 10 - 12%) during the course of many thousands of hours of operation. With a relative water consumption of 0.2 - 1% of the gas

THE EFFECT OF PRECEDING STEAM-CARRYING ELEMENTS OF LOCAL BOILING IN STEAMING TUBES (Vliyaniye Predvklyuchennykh Elementov na Vozniknoveniye Krizisa Kipeniya v Paragenerirushchikh Trubakh). Feb 61 [18]p. 8 refs. RTS 1685. Order from LC or SLA mi$2.40, ph$3.30 61-15867

Trans. of Teploenergetika (USSR) 1960 [v. 7] no. 5, p. 81-88.

9080654

A comparison is made of the experimental data obtained by various investigators on the critical density of heat fluxes during the boiling of water in tubes. Results of tests are given which establish the effect of the elastic properties of the medium contained in the preceding volumes and of the size of these volumes, upon the occurrence of local boiling in steaming tubes. ON CERTAIN PROBLEMS REGARDING THE AUTOMATION OF THERMAL POWER STATIONS. Oct 60 [12]p. RTS 1686.
Order from LC or SLA mi$2.40, ph$3.30 61-13497

Trans. of Teploenergetika (USSR) 1960 [v. 7] no. 6, p. 3-7.

A brief review is given of the stage reached in the automation of thermal power stations. Points are raised with regard to the necessity for analyzing the dynamic properties of plant units during the planning stage and with regard to the employment of controlling computers in power generation.
